<b>Allaberdiev Alijon</b>	<b>Teacher of Navoiy State Pedagogical Institute. City Navoi, Uzbekistan</b>	
<b>Abstract</b>		

This article explains the use of the Turkic words in the Bukhara uguz dialects and compares the Turkic words with other Uzbek dialects and the languages of Turkic language family. There is written the historical etymology of words, lexical layers, comparison, synonymous lines and some features of the vocabulary of the region. Some lexical units in Bukhara's Oghuz dialects are compared with Enasoy, Mahmud Koshghary's "Divan lugat at Turk" and "Attuhfa" monuments. In the lexicon of the region are explained the features of historical-etymology, lexical layers, checking, synonymous series.

The dictionary composition of the Bukhara Oghuz dialects is formed as the lexical-semantic system of the dialect. All lexical units and grammatical texts available in Bukhara's Oghuz Dialects (later BOD) are the essence of this sheet, its own wealth. However, these linguistic unions do not suddenly appear in the vocabulary of the word. The dictionary contains complex stages of development, as well as other Uzbek glossaries.

In order to understand and visualize the evolution of lexical units in BOD, it is necessary to study and analyze the words in the dictionary, to be etymologically subdivided into them. These linguistic actions are carried out to know the origin of the dialect word and to inform them about the scientific community. Most of the lexical units used in the speech of representatives of all Uzbek dialects living in Bukhara region, including the Oghuz dialect, are vague words for almost all Turkic peoples, and most of them can be found in Turkic written monuments. For this reason, N.A.Baskakov's famous work, "Introduction to the Turkic languages", characterized the main lexical fund of Turkic languages as a common unit for all Turkic languages [1, p. 118]. Sh.Shoabdurakhmanov also notes that "because of the fact that the Uzbek language belongs to the family of Turkic languages, many words (Uzbek Uzbek words) specific to the Uzbek language and its dialects have etymological unity with many other words in the dictionary of the Turkic languages" [5, p. 207] in his own work.

Indeed, the words that are used in the Uzbek language and its dialects the *бәши* (bosh), *йүрәк* (yurak), *мән* (men), *быир* (bir), *бәр* (ber), *қәрә* (qora), when we compared these words to the Turkmen, Azerbaijani, Turkish, Kazakh, Kyrgyz, Karakalpak, Tatar, and other languages, it is possible to see only partial phonetic changes: Tashkent dialects – *бәши*, *йүрәй*, *қәрә*, *мән*, *быир*, *бәр*; Ferghana dialects – *бәши*, *йүрәк*, *қәрә*, *мен*, *быир*, *бәр*; in Turkmen language – *баши*, *йүрек*, *гара*, *мен*, *бири*, *бар*; Azerbaijan language – *баши*, *үрәк*, *гара*, *мән*, *бири*, *вар*; in Turkish *baş*, *yürek*, *kara*, *ben*, *bir*, *var*; in Kazakh – *бас*, *жүрек*, *қара*, *мен*, *бір*, *бар*; in Kyrgyz – *бас*, *жүрек*,

кара, мен, бир, бар; in Karakalpak – бас, жүрек, қара, мен, бир, бар; in Tatar and Bashkir – баши, йөрәк, кара, мин, бир, бар and etc.

The original lexic units: сәққызы «сақич», гүн//күн «күн», әй «оу», ғөз // қоз, дыл, «til», әйәк «уюоq», бәши «bosh», дәз «tog'», дуз «tuz» like that nouns; қычы//қычык «kichik», қәтты «qattiq», әжсы «achchiq», ыссы «issiq», сұжы «chuchuk», үәңы «yangi», кетте «katta», үәмән «yomon», қәррү «qari» like that adjectives, быр «bir», ики «ikki», үч «uch», дөрт «to'rt», бәши «besh», алты «olti», иеди//иетты «yetti», секиз//сәккис «sakkiz», докуз «to'qqiz», он «o'n» like that numerals; дий «de(moq)», бол «bo'l», қәл «qol», чық «chiq», гит «ket», ғөр «ko'r», ғөзәр «ko'kar» like that verbs are shown as a example in the Bukhara Oghuz Dilalects dictionary.

Comparing the original Turkic words, which represent the names of the human body and household items, in the Kharezmian Oghuz dialects to the Turkmen, Azerbaijan, Turkish languages, the commonalities between them are evident: BOD, Oghuz, Turkmen, Azerbaijan: дииш, түрк. *Diş* «tish»; BOD, Oghuz үумрук, Turkmen юмрук, озар. юмруг, Turkish *yumruk* «musht»; BOD. сәкқәл, Oghuz *сәккәл*, Turkmen *сакгал*, озар. *саггал*, Turkish *sakal* «soqlı»; BOD құләк, Oghuz құлақ, Turkmen, Azerbaijan *гулак*, Turkish *kulak* «quloq»; BOD. қәпәк, Oghuz қанақ, Turkmen *габак*, Turkish *kapak* «qovoq»; BOD. додәк, Oghuz *додақ*, Turkmen *додак*, озар. *додаг*, Turkish *dudak* «dudoq, lab»; BOD, Oghuz ғыл, Turkmen, Azerbaijan *дил*, Turkish *dil* «til»; BOD бәғыр, Oghuz бағыр, Turkmen *багыр*, озар. *бағыр*, Turkish *bağır*; BOD. тәмәнә, Oghuz *тәмән*, Turkmen *темен*; Turkish *çuvaldzı* «juvoldız». BOD ҹәнәк, Oghuz ҹанақ, Turkmen *чанак*, озар. *чанаг*, Turkish *çanak*, *gagauz*. чанак «stovoqcha», BOD. сүсәк, Oghuz *сүсак*, *gagauz*, Turkmen *сүсак* «cho'mich» and others. From these linguistic evidences, the wealth of the original Turkic linguistic dictionary is characterized by historically stable and insignificant changes.

These comments are also confirmed by the lexical units listed in the Orkhun-Enasoy monuments and comparable to the rich dictionary dictionary: BOD. бәшиләмәк, Enasoy *башиламак* «бошламоқ»; BOD. эшыт, Enasoy *есит* «eshit», BOD. үош, Enasoy. *Йаш* «yosh»; BOD, Enasoy *йер* «yer»; BOD. ғүйчлы, Enasoy *кучлиг* «kuchli»; BOD. быргә, Enasoy *бирлә* «birga»; BOD, Enasoy *бәри* «bari»; BOD. ыйигирмә // ыйигирми, Enasoy *йигирме* «yigirma» (20); BOD. қәлин // ғәлин, Enasoy *келин* «kelin» ва ш.к. [2, p. 213-215].

Among the original Turkic lexical units in the vocabulary of the word, the interesting and original linguistic evidence for the researchers is extremely diverse and varied. It is possible to know and define the original Turkish linguistic units in this direction only through historical books on Turkish sources. It is the work of Mahmoud Koshgari's "Divan lugat at Turk", which draws the attention of all researchers in terms of the width and richness of these works.

The dialectologist Ahmad Ishaev, who specializes in the study of the Uzbek dialectology, wrote in his book "Divan lugat at Turk", Mahmud Koshgari, who founded the Comparative Study

of Turkic languages, to many other Turkic languages, including Kipchaq, Oghuz and Karluk-Chigil-Ugur dialects, more specifically, phonetic, grammatical, and especially lexical facts about the dialects of these lines. This is because the majority of the tribes (eg 92 Uzbek ethnicities) participated in the creation of the Uzbek nation and, secondly, the fact that one of the Turkic languages does not have many and diverse forms and dialects like the Uzbek language. These two factors, one of which require the other, have been preserved and recorded in Turkish written monuments in Uzbek, and many linguistic facts common to both general and non-common languages have been preserved "[3, p. 63-67].

Indeed, the lexical units belonging to the original Turkic layer used in the "Divan lugat at Turk" are also used today in Bukhara Oghuz Dialects. We have not yet seen how these linguistic units were used in the Uzbek literary language and Ferghana-Tashkent. According to these facts, it is possible to study these groups of lexical units in groups.

I. Lexical units, which are typical for ancient writing monuments, but are not available in the Uzbek literary language. These lexical units are a) the words that have their synonym in Uzbek: Divan. *aja* «*kaft*» (Index, 15), BOD. *ай*, Oghuz, Turkmen *а:**я* «*kaft*»; Attuhfa. *эл* (175), Ancient Turkic language. *el* (DTS, 169) «*qo'**l*, *kaft*», BOD. *эл* // *әл*, Turkmen *эл*, Oghuz *әл*«*qo'**l*»; Divan. *Jұмуртқа* «*tuxum*» (Index, 140), BOD. Oghuz *йұмуртқа*, Turkmen *юмуртқа*«*tuxum*»; Divan. *jitti*: *jīmīūmī* «*о'**tkirlatdi*, *charxlatdi*» (Index, 131), BOD. *Иттик* «*о'**tkir*», Turkmen *йити* «*о'**tkir*»; Divan. *kızlädi* «*yashirdi*» (Index, 160), BOD, Oghuz *гизләмәк*, Turkmen *гизлемек* «*yashirmoq*»; Divan. *Jitti* «*yo'**qoldi*» (Index, 134), BOD. *йүтти*, Oghuz *йытты*, Turkmen *йүтди* «*yo'**qoldi*»; Divan. *Чирілди* «*bog'**landi*» (Index 331), BOD. *чиғилди*, Oghuz *чиийилди*, Turkmen *чиғилди* «*bog'**landi*» and others. b) Uzbek literary language is not synonymous with the words: Divan. *Aңىз* «*don ekinlari o'rib olingen yer*» (Index, 20), BOD. *Ангара* «*hosili yig'ib olingen dala*». This lexical unity seems to have been interpreted as a *әнгәр*//*әнгор*//*әңчән* in the Uzbek language in Tajikistan as "harvested crops" [4, p. 54-56]. Divan. *Amىز* «*the crop between the two arcs*» (Index, 27), BOD. *Атыз*, Oghuz, Turkmen, Karakalpak *атыз* «*cultivated field, cultivated fruit crops*» and others.

II. The original Turkic words that change in their meaning. Some of the lexical units used in the ancient Turkic written monuments are now being used for some partial change in terms of meaning from the speech of the BOD. This process should be regarded as "the result of our language's developmental laws, because of the age, these words are gaining new significance and increasingly moving away from their meaning" [4, p. 55]. Here are some examples of lexical units: Divan. *Їмир* «*кош қорайған пайт (үғузча)*» (Index, 92). BOD. *Имир* "it is a bit of a rainstorm". This word in the Uzbek dialects is used as a *имир* (Khazarasp) «*дим*» (O'zxshl, 116), *ымырдуман* (Beruniy, Biybozor) «*tuman, qoratutun*» (O'zxshl, 122; E.O'rozov, 92), Turkmen *ұмур* «*steam mixture*» (TDS, 684). Divan. *Адаш* «*friend*», *адаштүк* «*friendship*» (Index, 11-12), in the BOD and other dialects used as a meaning *әдәши*//*адаш*; the appeal of such people to each other» (O'TIL, II, 1, 39). Compare: Turkmen *амдаш*«*адаш*» (ТДС, 57), Turk *adaş* «*адаш*» (TRS,

25); Divan. *ақур*.«отхона» (Index, 31), BOD and other Uzbek dialects are used as a meaning *ахыр//axyp//əxyp*, this word is mean «The livestock (sheep, goats, cattle, horses) is a feeding device» (O‘TIL, II, 3, 161). The meaning of the Uzbek language and its passages must have passed the Persian-Tajik language. The word "hothouse" in Persian-Tajik is represented by lexical units such as a *саисхона*, *асхона*, *ахтакхона*, *тавила* (Rustadjsl, 409), and feeding on livestock is given by the word ox (Rubinchik, 1, 56; Rustadjsl, 1240); Divan. *Cöl* «weat» (Index, 229), in the BOD and other dialects the word *сөл*, in the Uzbek literary language you can meet like that form *sel*, and it is mean the water of meat and blood (O‘TIL, II, 3, 476). Divan *әкә* «sister»; «older sister» (DLT, III, 13; Index, 40), in the BOD and other Uzbek dialects the word *әкә* is used as a mean « An elderly parent (in relation to his / her little ones)» in the Uzbek language. But in the Oghuz dialects of Uzbek language the word *әкә* as a mean «father» (Xsh, 22), as well as, in the Oghuz dialects the word *әкә* is synonym with the lexical unit *a:za*, it is mean in Russian *старший брат*. But in the Turkmen dialects depending on Oghuz group's language, for example, in the dialects yemrali, ota, arsari the word *әке* is mean «older sister», in the Kirach dialects *әке* is mean «brother», in the Nokhur and Murcha dialects the word *әке* is mean «papa». In the Turkmen literary language the word *әкеңчи* is mean «qaynegachi» (TDS, 799).

In conclusion, lexical units belonging to the original Turkic dialect have a characteristic feature in the Bukhara-Oguz dialect, historically stable and undergone. In this regard, original Turkish words in our subject matter are the common wealth of the BOD, the broader Uzbek and Turkic languages. Mahmud Koshgari's "Divan lugat at Turk", the common Turkic layer in the languages of the BOD and Oguz group, confirms that the linguistic phenomena of Oguz are still living and immortal. Historical and comparative study of the Divon and the linguistic facts in all Uzbek sheets confirms that the Uzbek literary language is lexically based on all folk folklore, not in any language [5, p. 316].
