Republic of Slovenia is the only European Union Member State to have protected its native bee [The Carniolian bee (Apis mellifera carnica)]. Slovenian Ethnographic Museum have preserved about one thousand of original beehive panels and they have permanent online exhibition of painting beehive panels. The academic book on painted beehive panels is based on the collection of the Slovene Ethnographic Museum.

THE MOTIF OF CULTURAL HERITAGE

Painted beehive panels are folk art created by and for the Slovene rural classes are known only from a limited area of the Slovene ethnic territory. They first appeared after the middle of the 18th century, achieved their greatest flowering in the period between 1820 and 1880, and end in the early 20th century in the face of changed socioeconomic condition. Despite their uniqueness, they achieve academic interest came only in the 1950s.

The first writings on beekeeping on Slovene territory came from Janez Vajkard Valvasor, who in 1689, in Slava vojvodine Kranjske (The Fame of the Duchy of Carniola), described beekeeping, but not beehive panels.

Beehive panels have also formed part of several exhibitions of Slovene folk art (for the first time in 1979 in the Slovene Ethnographic Museum (format approximately 13.5 x 26 cm or 15 x 33 cm or 13 x 24 cm))

“Only the front panels on these hives are decorated with pictures. They are usually 12 to 15 cm high, but of varying width. The front panels are usually of soft wood, but sometimes of hard wood”. “In the 18th century beehives with painted panels were kept on the front of the apiaries or stacked together under a temporary roof or under the overhang roof”. “The golden age of beehive painting was the 19th century; from the preserved examples with inscribed dates, we can conclude that most panels were painted between the 1840s and 1880s.” “From the information we have available. In the late 18th and early 19th centuries painted beehive panels were in use at least in parts of Upper Carniola, Lower Carniola and Carinthia. “Among the beehive panels preserved in public and private collections Slovenian Ethnographic Museum find over 600 motifs.”
### MOTIFS ON THE PAINTED BEEHIVE PANELS

1. 37% religious motifs consist of images of saints and saintly legends  
   - [e.g. Francis of Assisi, etc.]

2. 27% motifs from the New Testament  
   - [e.g. The Annunciation, etc.]
   - [e.g. The Creation of the First Four Days, etc.]

3. 21% motifs from the Old Testament  
   - [e.g. A guardian angel, Pieta, Mary's Wedding, etc.]
   - [e.g. Two Arabs fighting two lions, Two camels and an elephant, A lion, etc.]

4. 17% secular motifs showing professions and working scenes  
   - [e.g. Work in the field, Two blacksmiths, Seamstresses, etc.]
   - [e.g. Work in the field, A wagoner, Harvest, etc.]
   - [A battle between Austrian and Turkish archers, A military brass band, etc.]

5. 15% other motifs  
   - [e.g. A guardian angel, Pieta, Mary's Wedding, etc.]
   - [e.g. Two Arabs fighting two lions, Two camels and an elephant, A lion, etc.]
   - [e.g. A painter painting a portrait, A woman with a basket, A train, etc.]

6. 10% exotic motifs  
   - [e.g. Pigeons, a horse, a fox, etc.]
   - [e.g. Birdman, Personifications of Summer and Spring, etc.]

7. 10% animal motifs  
   - [e.g. Pigeons, a horse, a fox, etc.]
   - [e.g. A battle between Austrian and Turkish archers, A military brass band, etc.]

8. 9% other motifs, including ornamental ones  
   - [e.g. Birdman, Personifications of Summer and Spring, etc.]
   - [A battle between Austrian and Turkish archers, A military brass band, etc.]

9. 8% motifs from villages  
   - [e.g. Work in the field, A wagoner, Harvest, etc.]
   - [A battle between Austrian and Turkish archers, A military brass band, etc.]

10. 7% military motifs  
    - [e.g. A husband taking his wife out of an inn, etc.]
    - [e.g. A fox shaving a hunter; Animals dancing with peasants; Animals carrying a hunter to his funeral, etc.]

11. 6% motifs mocking female  
    - [e.g. A fox shaving a hunter; Animals dancing with peasants; Animals carrying a hunter to his funeral, etc.]

12. 6% motifs in which animals appear in human roles  
    - [e.g. A woman chasing away a man; A devil whetting a woman's tongue, Devils washing women's underwear, etc.]

13. 6% motifs depicting the relationship between the sexes  
    - [e.g. A woman chasing away a man; A devil whetting a woman's tongue, Devils washing women's underwear, etc.]

14. 6% hunting motifs  
    - [e.g. A hunter shooting a bear, etc.]

15. 1% secular motifs  
    - [e.g. A painter painting a portrait, A woman with a basket, A train, etc.]

</tbody>
</table>

9. ATU 300
   - Pegam and Lambergar\textsuperscript{10}
   - It shows a scene which is described in a poem from the oral tradition.
   - Before the duel, Pegam has a devil to his right and left and it was not clear which of the three heads was his. But Lambergar cut off the correct head in the centre.
   - The motif of the poem—a fight with a giant or an otherwise evil opponent—is certainly international.
   - In oral literature, it is common that various events and figures are often interpreted quite erratically.
   - The peasants' oral tradition, they no longer recognised the participants in the duel as historical persons.
   - The motif was popular on beehive panels.

10. ATU 1184
   - The devil's team of goats\textsuperscript{11}
   - Presumably because of its male dominance, the Billy-goat was considering a symbol of sexual desires associated with the devil from at least the Late Middle Ages onwards.
   - Withes were said to ride Billy-goat.

---

Beehive panels – Archimedes, Luther, Napoleon, Orpheus, Primavera

Beehive panels are one of the cultural attractions that are representative of the European context. The motifs on the beehive panels include religious and fantastic or fairy-tale motifs. On the website of the Slovenian Ethnographic Museum there are around a thousand of beehive panels and among them there are many motifs related to Slovenian (young adult) literature, e.g., the animals bury the hunter, Pegam and Lambergar, etc. The animal fairy tale that deserves special attention is *ATU *191* The Animals Bury the Hunter\textsuperscript{12}, because it relates to the fairy tale (and satirical) motif on the beehive panels.

\textsuperscript{10}https://www.etno-muzej.si/sl/panjske-koncnice
\textsuperscript{12}https://www.etno-muzej.si/sl/panjske-koncnice
PAINTED BEEHIVE MORIFS IN SLOVENIAN CHILDREN’S LITERATURE

In contemporary Slovenian young adult fiction, we can see the motif of the animals burying the hunter in the works of Josip Ribičič, Svetlana Makarovič (Katalenca s studenca [Katalenca from the Well]; Živali pokopljejo lovca [The Animals Bury the Hunter]), Andrej Rozman Roza (Lovska [A Hunting Tale]).

The contemporary Slovenian young adult fiction writer who writes for a double addressee, the young and the adult, by using satirical motifs, has also written an etiological or interpretative fairy tale entitled Od nastanka človeške ribice [From the Creation of the Olm], which is a literary variant of an animal fairy tale and is not the subject of this article, but nevertheless presents an interesting classification challenge - Slovenian endemic species – Andrej Rozman Roza: Od nastanka človeške ribice [From the Creation of the Olm] (2010); 2) Beehive endings: Svetlana Makarovič: Živali pokopavajo lovca [The Animals Bury the Hunter], (1983, 2002); Svetlana Makarovič: Katalenca s studenca [Katalenca from the Well], 2008; Josip Ribičič: Zverine pokopavajo lovca [The Beasts Bury the Hunter], 1940; Andrej Rozman Roza: Lovska [A Hunting Tale] (2010), also referred to by the author as “authorial units” that play an important role in disseminating the type or motif. Interesting is the beehive panel from the 1915 calendar entitled “Maj” [“May”] which refers intertextually to Botticelli’s Primavera (1480) and the modern fairy tale by Niko Grafenauer titled Mahajana (1990), with illustrations by Marija Lucija Stupica.

Multicultural Motifs

On painted beehive panels from 17th-21st Century today Slovenia was part of Habsburs Monarhy, Illyrian Province and Austro-Hungarian Empire (1848-1918) and the influence of the different cultures, languages and motifs are represented on the painted beehive panels. On the painted beehive panel we could find different cultural motifs e.g. Albanians [»Arnavtì« or Albanians]13, Africa [Two camel and an elephant], Arabs [Two Arabs fighting two lions], Arctic [Hunting a polar bear], Asia [Hunting a tiger], Germany [Two devils driving Luther and his wife Catherine to Hell], Greeks, French [A devil grabs Napoleon; A peasant rocking a Frenchman], Italy [Personifications of Summer and Spring [Primavera]], Jesualem [Christ's Sepulchre], Russia [The parties to the »Hoy Alliance«, Turkey [A Turk with a pipe]], etc.

The panel titled Albanians was found in Zgornja Šiška. In the Slovenian Etnographical Museum in inv. book the motif is called “Arnavtì” (Albanians). The meaning of the painted beehive panel has not been resolved. It could present an elderly man on the left side wearing a turban around his head, and three young men wearing white caps. Presumably this painted beehive panel based on a model or on one of the newspaper illustrations possibly about the Balkan wars.

Use of ICT in the classroom

The study is a case study of teaching Slovenian children’s literature at the Faculty of Education of the University of Ljubljana. With the students we mapped the cultural heritage, e.g. painted beehive panels, on Google Maps My Maps (free tool). We put the spatial context into the literary culture and the literary culture into the spatial context. The study case is an example of spatial mapping of literary culture in an educational context, e.g. for primary school students and Erasmus students.

As an academic case study, we use a project at the Slovenian Institute of Literature and Literary Studies14, which was conducted from 2011-2014. The project was carried out by the Institute of Slovene Studies at the Faculty of Arts of the University of Ljubljana in cooperation with the Department of Slovene Studies at the Faculty of Arts of the University of Ljubljana. It was a professionally conducted project in which the project team recorded or marked literary-historical data and monuments also in Literary Atlas of Ljubljana15 (2014)16 of 1) important personalities (321 authors), 2) monuments (1000 units), 3) theatres (42 units), 4) publishing houses (40 units) and 5) periodicals (97 units). All these elements form the infrastructure of literary culture, including the locations of Slovenia’s historical novels. The Literary Atlas of Ljubljana is a printed and partly electronic book in which places associated with personalities, institutions and monuments are mapped/marked.

Discussion

The Slovenian Ethnographic Museum in Ljubljana, Slovenia, preserves about a thousand original painted beehive panels and offers a permanent online exhibition on painted beehive panels. The scientific book on painted beehive panels is based on the collection of the Slovenian Ethnographic Museum. It is unique in the international context. We were able to find different cultures, languages and motifs from Africa, Asia, the Arctic, but above all from Europe and the Middle East. They express cultural heritage and have the function of newspapers and folk art. We could use cultural heritage, folk and fairy tales ... imaginary lands [e.g. Narnia], our own lives, etc. Our aim is to put literary culture in the space and find the space in literary culture with free application and using ICT in classroom.
